

SKILL

Dribbling and ball protection

SETUP

Every player has a ball. Create a grid large enough for space but small enough to create collisions.

HOW TO

Every player for themselves. Each player must keep control of their own ball while kicking other players ball out of the grid. Once a ball is outside of the grid that player is out of the game. As numbers inside the grid start to lower, make the grid smaller to continue challenging the players. Play until one player is left. He/she is the king/queen of knockout.
